

At OAS Lifting ...

We provide ideal lifting solutions offering all styles of overhead cranes, and hoists and engineered lifting devices. We provide training, in-field inspection and repair services that support our products.

OAS also provides sling and hoist testing (static / dynamic) — in-house or job site, all types of crane dismantling, upgradation etc. Some of the major market segments we serve are Steel, Construction, shipping, Energy, Oil and Gas, Automotive, Durable Goods and General Industry.

OAS is the authorized dealer for the GH CRANES & COMPONENTS –SPAIN, in Sultanate of Oman

Professional Skills

Oas lifting offers a wide range of products and services as a responsible, reputable cranes supplier in Oman. We have covered you throughout, from repair and maintenance to spares and renovations. Contact us through our website if required to receive specialist recommendations and answers. We offer the following:

Crane repairs

We are an industry leader in hoist and overhead crane services. Our highly trained service staff specializes in solving complex problems in emergency situations. We find creative solutions to even the most challenging overhead crane service requirements. Our personalized approach to overhead crane and hoist maintenance is just one of the many benefits of our service team. We strive to minimize your downtime. Our phones are answered 24 hours a day, 7 days a week and we work on all makes and models of crane and hoist.

Cranes renovations and improvements

if necessary, we can replace the hoist, electrical equipment and install varying frequency control unit or radio control unit, change over the size of cranes or turn over the form of power lines to a completely new site. Modifications and renovations can be carried out to increase productivity and/or safety.
